Full Description

The **SAE-PE4600F-1C1F1R** series is an unmanaged PoE switch that provides a solution where both power and data can be delivered from a single point, utilizing Power over Ethernet (PoE) over a single cable. It features 4 PoE Gigabit Ethernet ports and 3-gigabit uplink ports (1SFP+1RJ45+1Combo), ensuring any 1000Mbps link is supported. The 4 PoE ports can supply industry-standard IEEE 802.3af/at power to compatible PoE devices. With its advanced auto-sensing algorithm, the **SAE-PE4600F-1C1F1R** delivers power only to IEEE 802.3af/at compliant devices, eliminating concerns when connecting PoE or non-PoE devices. Additionally, it automatically cuts off power when PoE devices are disconnected.

Intelligently, this unmanaged PoE switch can automatically recognize the PoE requirements of connected devices, as well as their speed, duplex, and cable type. It also includes one-gigabit fiber port (SFP), which is ideal for smart CCTV network designers to enhance their planning and utilize the switch efficiently. The **SAE-PE4600F-1C1F1R** is built with high-quality components that have been rigorously tested, ensuring superior performance in stability and environmental adaptability. The product is designed to offer better resistance to corrosion and electromagnetic interference. Its power input is designed to be reliable and suitable for various environments, ensuring robust performance in diverse conditions.

Application

- IP cameras monitoring systems and transmitting systems
- Access points wireless systems and transmission data
- IP telephone, virtual PABX and intelligent unmanaged systems
- Monitoring TV medical
- School, campus, and... monitoring and remote control
- Wireless systems (AP) and transmission data
